

## CAIRNS MARLIN MARINA EVACUATION ASSISTANCE

### ► Scope of work

Date: Annual Recurring

Client: Private, Commercial & Tourism Operators

North Marine provides marina evacuation assistance in the Port of Cairns in the event of forecasted severe weather, tropical cyclones and Port closures directed by the Regional Harbour Master.

Upon the directive to evacuate Cairns Marlin Marina or other areas of the Port, NM is engaged to re-locate vessels to their designated area of shelter. NM workboats and crew tow unmanned vessels and assist those under power to their designated area of shelter. Once permitted, vessels are re-berthed in their usual location. Additionally, in preparation for severe weather, North Marine inspects/maintains existing moorings and installs cyclone-rated boat moorings.

Visit North Marine's  
page on preparing  
for severe weather

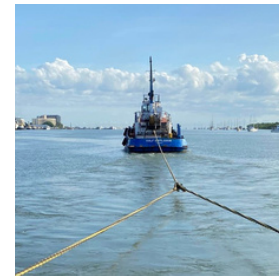

### ► Capabilities

- Emergency response mobilisation
- Harbour towage and/or vessel assistance
- Secure vessels/barges/pontoons in their designated location of shelter
- Re-locate vessels in marina or usual berthage
- Dry storage facilities for small watercraft and marine assets
- Cyclone-rated mooring installation & maintenance

### ► Outcome

North Marine successfully assists vessel owners & operators in the Port of Cairns to secure the safety of their assets during annual severe weather events.
