

LIVEBOARD RESEARCH CHARTER - GREAT BARRIER REEF

2022 - Ongoing

► Scope of work

Client: Great Barrier Reef Marine Park Authority, in collaboration with Department of Environment & Science - QPWS&P

North Marine is contracted to supply a charter vessel, for conducting turtle conservation project expeditions on the Great Barrier Reef.

As part of a collaborative study into the threatened species, NM's research vessel 'Escape' runs up to five, 14-day liveaboard trips per year to the northern GBR & Torres Strait. Accommodating Traditional Owners (TOs), conservation officers & scientists, along with multiple tender vessels, work stations & field research equipment. The studies investigate the impacts of climate change, inform area management, gather population data & enhance the co-management capacity of TOs.

Visit case study page on research charters on the Great Barrier Reef

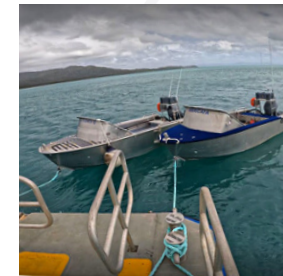

► Discriminators

- Adept at delivering logistically complex & remote projects
- Ethically, culturally & socially aware company, established operating in the sensitive habitats of the GBR Marine Park
- Extensive track record in Government contracting
- Suitable fleet of vessels that comply with WH&S, accommodation & biosecurity requirements
- Hold all necessary permits to conduct charter operations
- Local SME business with a local workforce & FNQ premises
- ISO accredited, experienced management & key personnel

► Outcome

North Marine has completed each research charter to date, with schedules and project requirements successfully fulfilled on-time and on-budget.
