

GAUGE BOARD INSTALLATIONS - EAST TRINITY RESERVE, QLD

► Scope of work

May - June 2023

Client: QLD Government - Department of Environment & Science (DES)

North Marine installed 13 new tidal gauge boards, inspected, braced & cleaned 17 existing boards and verified AHD heights to +/- 25mm.

Adjacent to Cairns Trinity Inlet, East Trinity Reserve has a dense, environmentally sensitive habitat, unstable terrain and limited access. NM used a combined shore and vessel-based methodology for the logistically complex and high-risk works, which required roving crocodile spotters and access clearing. New piles were driven with machinery custom-modified for the task; existing pile gauges were cleaned, strengthened or replaced. NM subcontracted a bathymetric surveyor to verify Australian Height Datum targets.

▶ East Trinity Gauge Board Locations

Straddling both the Wet Tropics World Heritage Area and the Great Barrier Reef World Heritage Area, East Trinity Reserve is one of the world's most successful acid-sulphate soil remediation projects.

It is a significant Mandingalbay Yidinji Indigenous Protected Area.
